

## Geospatial's Smart Probe™ Technology

**Geospatial Corporation offers innovative proprietary solutions to accurately and economically map all types of underground infrastructure pipelines. We have developed proprietary technologies and software to collect, store and retrieve XYZ coordinates and to create accurate 3D and GIS pipeline databases.**

### Key Features:

- Gyroscope-Based Inertial Measurement Unit
- Untethered and Self Contained
- Accurate and Economical
- Open Data Platform

### Application Areas:

- Telecommunications
- Industrial
- Oil and Gas
- Sewage
- Electric
- Water
